MODEL EXAM- 2014 S. P. College , Chandrapur.

Microbiology (III) Paper II Biotechnology and Bioinstrumentation

Time: 3 hrs

Max marks: 60

Note: All questions are compulsory and carry equal

1	Discuss the molecular basis of mutation OR	12
2	Give different methods of identification of transformed cells Give production of insulin by genetic engineering process. OR	12 12
3	Discuss principle and application of uv-visible spectroscopy.	12
a b c d	Discuss split genes. Give the method for joining of DNA fragments. Give short note on gene therapy. Write short notes on gel electrophoresis. OR	3 3 3
e f g h	Define muton, recon and cistron. Give short note on shuttle vector. Discuss the hazards of genetic engineering techniques. Write short notes on isotopic tracer techniques.	3 3 3
a b c d	Discuss Griffith's experiment. How rDNA is introduced into host cell. Write short notes on biosensors. Write short notes on thin layer chromatography. OR	3 3 3
e f g h	Discuss specialized transduction. Write short note on RFLP. Discuss protoplast fusion. write short note on ion exchange chromatography.	3 3 3
5 abcdefgb	What is recombinant. What is transconjugant. What is electroporation. Define suicide vector. Define biopesticide with example. Define hybridoma. What is Svedberg unit.	1 1/2 1 1/2 1 1/2 1 1/2 1 1/2 1 1/2

ALL THE BEST
